Please list samples ID's and/or lab reports:

Sufficient information must be provided in the Site History to justify the limiting of the analytical requirements necessary for recycling.

I, the generator/LSP/QEP, have included sufficient information justifying the limiting of the analytical requirements as part of the Site History Information accompanying the 21E Bill of Lading and Material Shipping Record. This includes, at a minimum, the following:

- Analytical Parameters Selected
- Screening Data (i.e. Total date for TCLP, Headspace)
- Laboratory Analytical Data
- Description of the Release
- Physical description of the soil including the classification method used
- Description of the site location with regards to former and current usage
- Complete Site History
- Site Diagram

GENERATOR / LSP / QEP STATEMENTS: (Check one)

I, the generator/LSP/QEP, using due diligence have determined that there is no reason to Suspect or believe the PCS has been impacted by any release of oil or hazardous materials other than that of the known source or I have identified the additional oil and hazardous materials that are suspected or known to be present in the PCS, in addition to those associated with the known release including any anthropogenic contaminants.

I, the generator/LSP/QEP, realize that due diligence shall consist of a search of information and records reasonably available to the generator of the PCS sufficient to make the determination. Such records and information may include, but are not limited to, those of the generator, location of the generation (Facility if not the generator) the Department Bureau of Waste Site Cleanup, and the municipality (Board of Health, Fire Department) within which the site is located.
